Fiverr Bug-Fixing Gigs: Complete Setup Plan

Everything you need to copy into Fiverr for 4 gigs: title, category, tags, 3 packages, extras, description, FAQs, buyer requirements and gallery.

Step 1: Should you delete your current gigs?

No, don't delete them. Deleting is permanent and you lose the gig's age, impressions and history. **Edit** the gigs that fit the new plan and **pause** the ones that don't. A paused gig can be turned back on anytime, and an edited gig keeps its history.

Current gig	What to do	Becomes
build custom shopify sections in liquid...	**EDIT**	Gig 1: Shopify fixing
fix supabase errors, auth, rls ... lovable or bolt apps	**EDIT**	Gig 2: AI-built app fixing
build or fix your flutter and react native supabase backend	**PAUSE**	-
setup tiktok shop with shopify...	**PAUSE**	-
(new)	**CREATE**	Gig 3: React / Next.js fixing
(new)	**CREATE**	Gig 4: Deployment fixing

Step 2: Order of work

1. Pause the Flutter and TikTok gigs (Manage Gigs > tick gig > Pause).
2. Edit the Shopify gig into Gig 1, then the Supabase/Lovable gig into Gig 2. Change everything in one go and save once.
3. Create Gig 3 and Gig 4 as new gigs.
4. Update your profile: headline **"MERN Stack & Shopify Developer | Bug Fixing & Deployment"** and add the skills React, Node.js, MongoDB, Next.js, Shopify, Liquid, Supabase.
5. After publishing, **don't edit the titles again** for at least 3-4 weeks.

Step 3: Daily habits that bring orders

- Keep the Fiverr app online, especially 6 PM - 3 AM Pakistan time (US buyers).
- Reply to every message within 1 hour to keep your response rate at 100%.
- Check **Briefs** every day and send a short, personal offer that names the buyer's exact problem.
- Deliver early, over-communicate, and politely ask happy buyers for a review.
- Share your gigs in Reddit, Discord and Facebook groups for Shopify, Lovable, Bolt and React by answering questions first.
- Raise your Basic prices by about 30-50% after 5-10 five-star reviews.

Fiverr limits used in this plan: title max 80 characters, description max 1,200 characters, 5 tags, package description max 100 characters. Every text in this PDF already fits these limits, so you can copy and paste it directly. If Fiverr's category list looks different, pick the closest match.

Gig 1: Shopify Store Fixing

Action: EDIT your existing Shopify Liquid gig into this (keeps its history)

1. Gig Title

I will fix shopify theme errors, liquid bugs and store issues (61/80 chars)

2. Category

Programming & Tech > Website Development > Shopify (choose 'Bug Fixes' / 'Customization' if offered)

3. Search Tags (all 5)

shopify fix | **shopify developer** | **shopify bug fix** | **liquid** | **shopify expert**

4. Packages (Pricing)

	Basic	Standard	Premium
Name	Quick Fix	Store Repair	Full Store Fix
Description	Fix 1 Shopify theme bug, Liquid error or layout issue on your store	Fix up to 3 Shopify issues: theme, sections, cart, product page or app conflicts	Fix up to 6 issues or 1 complex problem plus speed check and 7 days support
Delivery	1 day	2 days	4 days
Revisions	1	2	3
Includes	• 1 issue fixed • Tested on desktop & mobile • Explanation of the fix	• Up to 3 issues fixed • Mobile responsive check • Code cleanup • Explanation of the fix	• Up to 6 issues / 1 complex issue • Speed & console error check • Code cleanup • 7 days free support
Price	**$15**	**$40**	**$90**

5. Gig Extras

Extra	Price
Extra-fast delivery (12 hours)	**+$10**
Additional issue fixed	**+$10**
Speed optimization	**+$25**

6. Description (907/1200 chars)

Is your Shopify store broken, showing errors or not looking right?

I'm a Shopify and full stack developer. I find the real cause of the problem and fix it properly, without installing extra paid apps.

I can fix:
• Liquid errors and broken theme code
• Product page, cart and checkout button issues
• Broken sections, sliders and layouts after theme updates
• Mobile responsive and CSS problems
• App conflicts and JavaScript console errors
• Variant, price and image display bugs

Why work with me:
• Fast delivery, most fixes within 24 hours
• I work on a duplicate theme, so your live store stays safe
• Clear explanation of what was wrong and what I changed
• Clean, tested code on desktop and mobile
• Free revision if the same issue comes back

Please message me before ordering with your store link and a screenshot or short video of the problem. I'll confirm the fix and give you an exact timeline.

7. FAQs

Q: Do you need my Shopify password?
A: No. Please send a collaborator request or staff access. Never share your password.

Q: Will you work on my live theme?
A: No. I duplicate your theme, fix it there, and publish only after you approve.

Q: What if you can't fix the issue?
A: If I can't fix it, you get a full refund.

Q: Can you fix it urgently?
A: Yes. Add the Extra-fast delivery option and I'll deliver within 12 hours.

Q: Do you work with any theme?
A: Yes: Dawn, Debut, Impulse, Prestige and other free or paid themes.

8. Requirements (questions for the buyer)

1. What is your Shopify store URL? (required)
2. Describe the issue and where it happens. Add screenshots or a video if possible. (required)
3. Please send a collaborator access request code or staff account. (required)
4. Which theme are you using, and did the issue start after an update or app install?

9. Gallery & Thumbnail

Image 1 (thumbnail): split image, red broken store on the left, green 'FIXED' store on the right, big text 'Shopify Bugs Fixed in 24 Hrs'. Images 2-3: real before/after screenshots of fixes you've done (or demo store fixes). Video (optional, 30-60 sec): screen recording fixing a Liquid error.

Size 1280 x 769 px. Use a high-contrast design and no more than 5 words of text so it's readable on mobile.

Gig 2: AI-Built App Fixing (Lovable, Bolt, Cursor, v0)

Action: EDIT your 'fix supabase errors ... lovable or bolt apps' gig into this

1. Gig Title

I will fix bugs in your ai generated app from lovable, bolt, cursor or v0 (73/80 chars)

2. Category

Programming & Tech > Website Development (or 'AI Development' if offered for vibe-coded apps)

3. Search Tags (all 5)

fix ai code | **lovable** | **bolt** | **cursor** | **vibe coding**

4. Packages (Pricing)

	Basic	Standard	Premium
Name	Single Bug Fix	App Repair	Production Ready
Description	Fix 1 bug or error in your Lovable, Bolt, Cursor or v0 app	Fix up to 3 bugs: auth, database, API, Supabase or UI issues	Fix up to 6 bugs, clean code and help deploy your app live with 7 days support
Delivery	1 day	2 days	4 days
Revisions	1	2	3
Includes	• 1 bug fixed • Root cause explained • Tested before delivery	• Up to 3 bugs fixed • Supabase / database check • Code cleanup • Root cause explained	• Up to 6 bugs fixed • Security & RLS check • Deployment help • 7 days free support
Price	**$20**	**$50**	**$120**

5. Gig Extras

Extra	Price
Extra-fast delivery (12 hours)	**+$15**
Additional bug fixed	**+$15**
Deploy to Vercel / Netlify	**+$20**

6. Description (908/1200 chars)

Did you build an app with Lovable, Bolt, Cursor or v0 and now it's stuck with errors the AI can't fix?

I'm a full stack developer (React, Node.js, MongoDB, Supabase). I fix the code by hand, so your app finally works the way you wanted.

I can fix:
• Login, signup and authentication errors
• Supabase database, RLS and permission issues
• Broken API calls and data not saving or loading
• Build errors and white screen problems
• UI bugs, layout and responsive issues
• Deployment failures on Vercel or Netlify

Why work with me:
• I understand AI generated code and its common mistakes
• Fast delivery, most fixes within 24-48 hours
• Clear explanation so the AI doesn't break it again
• Clean, tested code and no new bugs
• Free revision if the same issue comes back

Please message me before ordering with your error message or a short video of the problem. I'll check it and give you an exact timeline.

7. FAQs

Q: Can you work on Lovable or Bolt projects directly?
A: Yes. You can connect the project to GitHub and give me access, or invite me to the project.

Q: Will I still be able to edit my app with AI after your fix?
A: Yes. I keep the same structure so you can continue building with your AI tool.

Q: Do you fix Supabase issues?
A: Yes: auth, RLS policies, database tables, storage and edge functions.

Q: What if you can't fix it?
A: If I can't fix the issue, you get a full refund.

Q: Do you need my passwords?
A: No. GitHub access and an invite to your Supabase project are enough.

8. Requirements (questions for the buyer)

1. Which tool did you use to build the app? (Lovable, Bolt, Cursor, v0, other) (required)
2. Describe the bug and paste the error message or screenshots. (required)
3. Please share GitHub access or invite me to the project. (required)
4. Which backend do you use? (Supabase, Firebase, Node.js, other)

9. Gallery & Thumbnail

Thumbnail: dark background with an error box turning into a green check, text 'AI App Broken? I'll Fix It' and small logos of Lovable / Bolt / Cursor / Supabase. Images 2-3: before/after screenshots of an error fixed. Video (optional): 30-60 sec of you fixing a Supabase auth error.

Size 1280 x 769 px. Use a high-contrast design and no more than 5 words of text so it's readable on mobile.

Gig 3: React / Next.js Bug Fixing

Action: CREATE NEW

1. Gig Title

I will fix bugs and errors in your react or nextjs website (58/80 chars)

2. Category

Programming & Tech > Website Development (choose 'Bug Fixes' / 'Website Maintenance' if offered)

3. Search Tags (all 5)

react bug fix | **fix react errors** | **nextjs developer** | **react developer** | **javascript**

4. Packages (Pricing)

	Basic	Standard	Premium
Name	Quick Fix	Bug Bundle	Full Debug
Description	Fix 1 bug or error in your React or Next.js website	Fix up to 3 bugs: UI, state, API, routing or build errors	Fix up to 6 bugs or 1 complex issue plus performance check and 7 days support
Delivery	1 day	2 days	4 days
Revisions	1	2	3
Includes	• 1 bug fixed • Root cause explained • Tested before delivery	• Up to 3 bugs fixed • Console errors cleaned • Code cleanup • Root cause explained	• Up to 6 bugs / 1 complex issue • Performance check • Code cleanup • 7 days free support
Price	**$15**	**$40**	**$90**

5. Gig Extras

Extra	Price
Extra-fast delivery (12 hours)	**+$10**
Additional bug fixed	**+$10**
Upgrade React / Next.js version	**+$30**

6. Description (926/1200 chars)

Is your React or Next.js website throwing errors, not loading, or not working the way it should?

I'm a MERN stack developer with hands-on experience in React, Next.js, Node.js and MongoDB. I find the root cause and fix it properly, not with quick patches.

I can fix:
• Console errors, crashes and white screen issues
• useState, useEffect and state management (Redux, Context) bugs
• API fetching and data not showing
• Routing, navigation and Next.js SSR / hydration errors
• Build and npm / dependency errors
• Broken layouts, CSS, Tailwind and responsive issues

Why work with me:
• Fast delivery, most fixes within 24 hours
• Clear explanation of what was wrong
• Clean, readable and tested code
• No changes outside the issue unless you approve
• Free revision if the same issue comes back

Please message me before ordering with the error details or screenshots so I can confirm the fix and give you an exact timeline.

7. FAQs

Q: How do I share my code?
A: Through GitHub (preferred), GitLab, Bitbucket or a zip file.

Q: Do you work with TypeScript?
A: Yes, both JavaScript and TypeScript projects.

Q: What if you can't fix it?
A: If I can't fix the issue, you get a full refund.

Q: Can you also fix the backend?
A: Yes. I also fix Node.js, Express and MongoDB issues. Message me for details.

Q: Can you fix it urgently?
A: Yes. Add the Extra-fast delivery option and I'll deliver within 12 hours.

8. Requirements (questions for the buyer)

1. Describe the bug and paste the error message or screenshots. (required)
2. Please share GitHub access or upload a zip of the project (without node_modules). (required)
3. Which versions do you use? (React / Next.js / Node.js)
4. Steps to reproduce the issue, and the expected result.

9. Gallery & Thumbnail

Thumbnail: code editor with a red error turning into green 'Compiled successfully', React + Next.js logos, text 'React Bugs Fixed in 24 Hrs'. Images 2-3: before/after of a broken UI vs fixed UI. Video (optional): 30-60 sec debugging a React error.

Size 1280 x 769 px. Use a high-contrast design and no more than 5 words of text so it's readable on mobile.

Gig 4: Deployment Error Fixing

Action: CREATE NEW

1. Gig Title

I will fix deployment errors on vercel, netlify, render or vps (62/80 chars)

2. Category

Programming & Tech > Website Development (or 'DevOps & Cloud > Deployment' if offered)

3. Search Tags (all 5)

deployment fix | **vercel** | **netlify** | **deploy react app** | **nodejs deployment**

4. Packages (Pricing)

	Basic	Standard	Premium
Name	Deploy Fix	Full Deploy	VPS Setup
Description	Fix 1 deployment or build error on Vercel, Netlify or Render	Deploy frontend + backend (MERN / Next.js) with env setup and custom domain	Deploy on VPS with Nginx, PM2, SSL, domain and auto restart plus 7 days support
Delivery	1 day	2 days	3 days
Revisions	1	2	2
Includes	• 1 deploy error fixed • Environment variables setup • Live link delivered	• Frontend + backend deployed • Custom domain connected • SSL (https) setup • Env variables setup	• VPS setup (Nginx + PM2) • Domain + SSL • Database connection • 7 days free support
Price	**$20**	**$50**	**$100**

5. Gig Extras

Extra	Price
Extra-fast delivery (12 hours)	**+$15**
CI/CD auto deploy from GitHub	**+$25**
MongoDB Atlas setup	**+$15**

6. Description (937/1200 chars)

Your app works on localhost but fails when you deploy it?

I'm a MERN stack developer and I fix deployment problems on Vercel, Netlify, Render, Railway and VPS servers, so your app goes live and stays live.

I can fix:
• Build failed and npm / dependency errors
• Environment variables and API keys not working in production
• CORS errors and frontend not connecting to backend
• 404 errors on page refresh and routing issues
• MongoDB / database connection errors in production
• Custom domain, DNS and SSL (https) problems
• Node.js server crashes, Nginx and PM2 setup on VPS

Why work with me:
• Fast delivery, most fixes within 24 hours
• I explain what caused the error so it doesn't come back
• Secure setup, your keys are never exposed
• Live working link delivered and tested
• Free revision if the same issue comes back

Please message me before ordering with your build log or error screenshot and the hosting platform you use.

7. FAQs

Q: Which platforms do you work with?
A: Vercel, Netlify, Render, Railway, Heroku, DigitalOcean, AWS EC2 and other VPS.

Q: Do I need to share my hosting password?
A: No. Please add me as a team member or collaborator on the platform.

Q: Can you deploy both frontend and backend?
A: Yes. Choose the Standard package for a full MERN or Next.js deployment.

Q: What if you can't fix it?
A: If I can't fix the issue, you get a full refund.

Q: Can you connect my custom domain?
A: Yes. Domain, DNS and SSL setup are included in Standard and Premium.

8. Requirements (questions for the buyer)

1. Which hosting platform are you using? (required)
2. Paste the build log or error message, or add screenshots. (required)
3. Please share GitHub access and add me as a collaborator on the hosting platform. (required)
4. Do you have a custom domain? If yes, where is it registered?

9. Gallery & Thumbnail

Thumbnail: 'Build Failed' in red changing to 'Deployed' in green, Vercel / Netlify / Render logos, text 'Deployment Errors Fixed'. Images 2-3: screenshots of a successful deploy dashboard and a live site. Video (optional): 30-60 sec fixing a failed Vercel build.

Size 1280 x 769 px. Use a high-contrast design and no more than 5 words of text so it's readable on mobile.
